

Streamline your distribution and **save money** at the same time!

We are pleased to announce our newest service!

Store-N-More

Complete Warehousing and Fulfillment

Spectra Print has set aside over 25,000 square feet of warehousing space at our new Stevens Point facility to accommodate this new and customer driven service. When you place a printing order with Spectra Print you'll now be able to have us take care of warehousing your printed product as well as fulfillment to your client's specification. This will save you additional shipping costs normally incurred shipping to your location first. With today's high costs of freight that means substantial savings to you.

Additionally, if you have product that you need warehousing space for and distribution of, we can accommodate that as well. With our efficient Pick & Pack service we'll be able to handle all your distribution needs in a timely and cost-effective manner.

When you do business with Spectra Print you're getting much more than just a printer. You're getting a company that is committed to total customer satisfaction and performance.

Please take the time to review the pricing schedule on the back side of this sheet to give you a better idea of how you can save money with Spectra Print Store-N-More.
